### **Up Again**

Currently among investments concentrated on long-life natural gas with low financial and management risk, **San Juan Basin Royalty Trust** ranks most undervalued followed by **Cross Timbers Royalty Trust, Hugoton Royalty Trust** and **Dorchester Hugoton, Ltd.** (see table). Weighing the week's changes in prices of oil, natural gas and money, all favorable, our calculated asset values gain 3% and our projected distributions for the next year gain 10%. Long-term oil price continues to set new highs reinforcing our bias that oil and gas prices are in the midst of a staircase adjustment upward and not just on a spike. A continuation of today's price is needed by the industry to meet economic growth and most of the negative impact on consumers and other industries has already been absorbed.

Cross Timbers Royalty Trust	CRT	13.25	2.24	2.87	16.9	21.7

During the past week we analyzed final disclosures for the second quarter for CRT, DHULZ and HGT. CRT's volume was disappointing as discussed separately (see Research Note, CRT, August 2, 2000). DHULZ reported volume in line and made a negative provision for a tax penalty that may yet be reversed. HGT was in line with expectations.
