The Tipping Point

Borrowing from the thinking of Malcolm Gladwell, author of the best selling book, we can see a possible "tipping point" to higher oil and gas pricing. The tightest underlying energy supply/demand situation in three decades now appears well accepted by "early adopters". We may be on the verge of a burst of acceptance by the mainstream that could lead investors to embrace energy stocks with urgency. Some unanticipated small event could catalyze the rapid change. Might Hugo Chavez of Venezuela rouse the producers in 2001 as Colonel Qaddafi did in 1973? Might oil at \$40 a barrel, or higher, be around the corner?

Our natural gas trusts and partnerships should participate in higher oil and gas values. **Dorchester Hugoton, Ltd.** seems to be getting the most direct benefit as its wellhead price is following the market most closely. **Cross Timbers Royalty Trust** has some oil production that should participate in potential further gains. Otherwise CRT and **San Juan Basin Royalty Trust** appear to be losing some of the sharp price gains to marketers and/or pipelines. An abnormal spread has opened between the San Juan Basin wellhead price and that for the rest of the industry. The differential with marker natural gas is more than \$1.00 an mcf compared to about \$0.40 normally. We believe the abnormal spread is temporary. Meanwhile our projection of payout for SJT has actually increased because latest disclosures point to a stronger volume trend that is enough to offset the pricing lag.

Despite recent stock market gains, SJT continues to rank most undervalued followed by CRT, **Hugoton Royalty Trust** and DHULZ (see table).

Note: The trust was formed on December 1, 1998. Also there is a two month lag between actual and reported production.

As a result, the first year of operations includes only eleven months of actual production from December 1998 through October 1999.
